# Fundamentals of Accounting & Conceptual Framework

## Accounting Universe

- Accounting Principles → Accounting Standards → Accounting Books → Financial Statements

## Accounting Principles

- Accrual Principle and Matching Principle
  - Expenses are recorded in the period in which the benefit is received, regardless of when the cash is paid out.
  - Income is recognized when the service or product is provided, irrespective of when the cash is received.
- Monetary Principle
  - Only events that can be denoted in monetary value should be recorded in the financial statements.
- Periodicity Principle
  - Periodicity Principle requires that an entity's life be divided into artificial periods for reporting purposes, such as months, quarters, or years.
- Consistency Principle
  - Consistency Principle mandates the consistent application of accounting policies and principles from one period to the next.
- Conservatism Principle
  - According to Conservatism or the Prudence Principle, all estimated losses should be recorded before they occur, while estimated gains should not be recorded.
- Going Concern Principle
  - Going Concern Principle assumes that a business will continue to operate indefinitely, and assets are not intended to be liquidated in the near term.

## Accounting Standards

- Rules and guidelines set by regulatory bodies to standardize the way financial transactions are recorded and reported.
- Types of Accounting Standards
  - US Generally Accepted Accounting Principles (US GAAP)
  - International Financial Reporting Standards (IFRS)

## Accounting Books

- Journals
- Ledgers
- Trial Balance

## Financial Statements

- Income Statement
- Statement of Comprehensive Income
- Balance Sheet
- Cash Flow Statement
- Statement of Changes in Equity
- Notes to Accounts

## Accounting Process

- Journals → Ledger → Unadjusted Trial Balance → Record Adjusting Journal Entries → Adjusted Trial Balance → Financial Statements

# Double Entry Accounting System

- Double-Entry Accounting System requires that for every Financial Transaction, there must be an equal and opposite effect in at least two different accounts.

- In the Double-Entry System, transactions are recorded as Debits and Credits.

Account Type	Balance Type	Increase	Decrease
Assets	Debit	Debit	Credit
Liabilities & Equity	Credit	Credit	Debit
Income & Gains	Credit	Credit	Debit
Expenses & Losses	Debit	Debit	Credit
